Shark Tank Idea · Sanskrit for: Voice

VAANI

APP STRUCTURE:

Each student has the app downloaded on their own phone, but all the information (database) is with the school.
However, information stays purely confidential, only shared when:

- Psychiatrists will be professional, selected only after required documents are submitted.
- BEST, customers always have option to meet a psychiatrist. If they miss their appointments more than 5 times, they receive a penalty.

PROBLEMS:

As app itself requires counsellors for accurate solutions → We will be requiring lakhs of them.

1. This is not solving problem of lack of counsellors
2. Connecting with psychiatrics throughout the country to supervise the app is hard.
3. Only using AI to solve mental health problems makes the app a chatbot.

Solution:

- Our app works in a hybrid system:
  1. AI helps people navigate through simple, basic mental issues
  2. Psychiatrists will be professional, selected only after required documents are submitted.

- App Aim: Helps students at school with mental well-being.
- MAIN COLOURS <theme>: Muted Clay Ember [#D29B30] Dusty Rose [#DCA1A1]
- LOGO: (not decided)

Credit system for psychiatrists:

- Psychiatrists get credit (in-app) for every problem they solve. This can be added in their resume. (Credits depend on seriousness of problem).
- How to pay psychiatrists ??

If psychiatrists receive calls and solve issues from 10pm-6am, they receive extra credit.

PROBLEM 1

Solution:
This will only be a part-time job for psychiatrists, they can redeem the credit as cash anytime they want.

App Interface:

Front page:

(1st time)

VAANI
Terms & Conditions —
text abt different functions of the app, and how your info. will be used. <mention Right to Privacy>

(any other time)

VAANI
Welcome back!
Enter username — } in case of invalid combination, app will give message that user doesn't exist.
Role —

Then leads to:

VAANI
Select your role
- Student
- Counsellor
<selected under counsellor supervision>

For student

VAANI
Fill in all the necessary details
-- name -- (username)
-- age -- + -- Date of birth --
-- gender --
-- weight & height --

NOT name & code for student
Includes:
- Username
- Password

Has restrictions on the name being put (To stop students from giving Bullshit name)

VAANI

(Originality checked by ??)

(only if documents are valid)

PROBLEM 2

VAANI
[this is only meant to be interpreted as a part-time job]
Choose your suitable time slot for working:
- 6am - 12pm
- 12pm - 4pm
- 4pm - 8pm
- 8pm - 10pm

(for counsellors)

Dashboard:

1. Contains list of all students who were forwarded to him/her via AI.
2. Contains feedback from students
3. Contains total credit obtained
4. Area to keep personal notes about each student

PROBLEM 3

Gamification:
Streak is maintained for every day the questionnaire is answered. There are 2 chances given to save the streak. On 3rd chance, streak is lost.

Daily questionnaire: [Answer in 3-4 lines max]
i) How did I sleep last night?
ii) What is my current energy level?
iii) What dominant emotion am I feeling right now?
iv) Am I feeling calm or overwhelmed today?
v) Have I connected with anyone today?
vi) How am I reading to daily stressors?
vii) Did I experience any moments of joy?
+ 2-3 minute video where student speaks about his/her day

How to make AI understand what exactly is 'severe'??

AI will assess the answers to understand mental and emotional status of the student. If stuff gets worse, AI redirects the chat to an available psychiatrist.

AI sends message: "You are recommended to see a psychiatrist"
- School is notified of student's condition
- Available psychiatrist is contacted immediately.

Any available counsellor talks to child / class teacher takes over to handle the matter

3. Chat: User can chat with the virtual pet of their choice (which is actually AI. AI personality changes based on the animal chosen)

4. Secondary features:
- Self-help books (audiobooks)
- Meditation guides

Features:

1. Calendar (only for that week)
